

The Mammal Society was founded in 1954 to promote the study of mammals. It organises meetings and surveys, and produces a range of publications. It is a registered charity, and welcomes both professional and amateur members.

Other publications in this series:

- No.1 Otter Spraint Analysis by Jean Webb 12pp.
- No.2 Identification of Remains in Owl Pellets by D.W.Yalden 8pp.
- No.3 Live Trapping Small Mammals - a Practical Guide by J.Gurnell and J.R.Flowerdew 24pp.
- No.4 Identification of Larval Ticks found on Small Mammals in Britain by K.R.Snow 14pp.
- No.5 Identification of British Bats by D.W.Yalden 14pp.
- No.6 The Scientific Names of British Mammals and Why They Change by D.W.Yalden 11pp.
- No.7 Preparation of Mammal Skins for Scientific, Educational and Display purposes by P.Morris and S.Wroot 15pp.
- No.8 Discovering Mammals: Practical Projects for Young People by Elizabeth Lenton. 37pp.

These and other publications, plus information about the Society and its activities may be obtained from the Mammal Society office at the address below.
